920 - Galvalume Plus Steel

**ShadowBAK**  
wash coat®  
Non-Reflective Disappearing Wash Coat

**Found on the Interior of Senox Painted Aluminum Gutters**

ShadowBAK® is a washcoat specially formulated by Senox that gives the inside of the gutter a non-reflective finish. The anodized bronze appearance provides the vanishing properties of a black shadow and erases the transition lines from the gutter to the roof.

Contact Clint Morgan 800-973-3102 for more information on Licensed Products

1. The front lip and associated hangers are available in K-Style (K-STYLE), Pocket Lock Lip (PLL), and Reverse Bead Half Round (RBHR).

2. The face and bottom are available in OG (OG), Flat Face (FF), and Half Round (HR).

3. The back and gutter bumpers are available in Straight Back (SB), Straight Back High/Low (SBHL), Half Round Reverse Bead (HR), Half Round Wedger (HW), and Half Round High Back (HH).

4. Gutterguards are available in K-Style, BearCLAW, AqueDUCT, and LeafLID.

The major discrepancy in everyone's mind is centered around OG vs. K-Style. Our opinion is OG speaks to the shape of the gutter face. This shape has been around since the Greeks. K-Style describes the hanger style and front lip design on the top of the OG shape. Over time the K-Style front lip and the OG shape have become synonymous in people's minds. Because of the new styles of front lips and hangers, this thinking needs to be separated to allow us to describe them separately. Our additional designs for the back of the gutter also call for more precise definitions.
